

Why should your business join the electric driving revolution?

Car. Charger. Energy.
The whole package with salary sacrifice.

Salary sacrifice.

Save up to 40% on a brand new electric car

How does it work?

It's as easy as 1, 2, 3

1

Like cycle-to-work, but for electric vehicles.

2

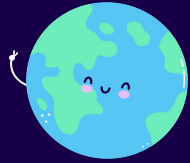

You give up some of your gross monthly pay for a new EV.

3

You save income tax and national insurance, and pay a little company car tax.

EV salary sacrifice helps your business become more sustainable and rewards your team, with no cost to the company

Hit your sustainability goals

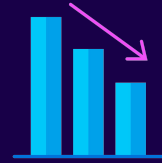

Lead the charge against climate change.

Give your team an alternative to petrol & diesel.

Attract and keep the best talent

75% of employees are more likely to stay with their employer because of their employee benefits package.

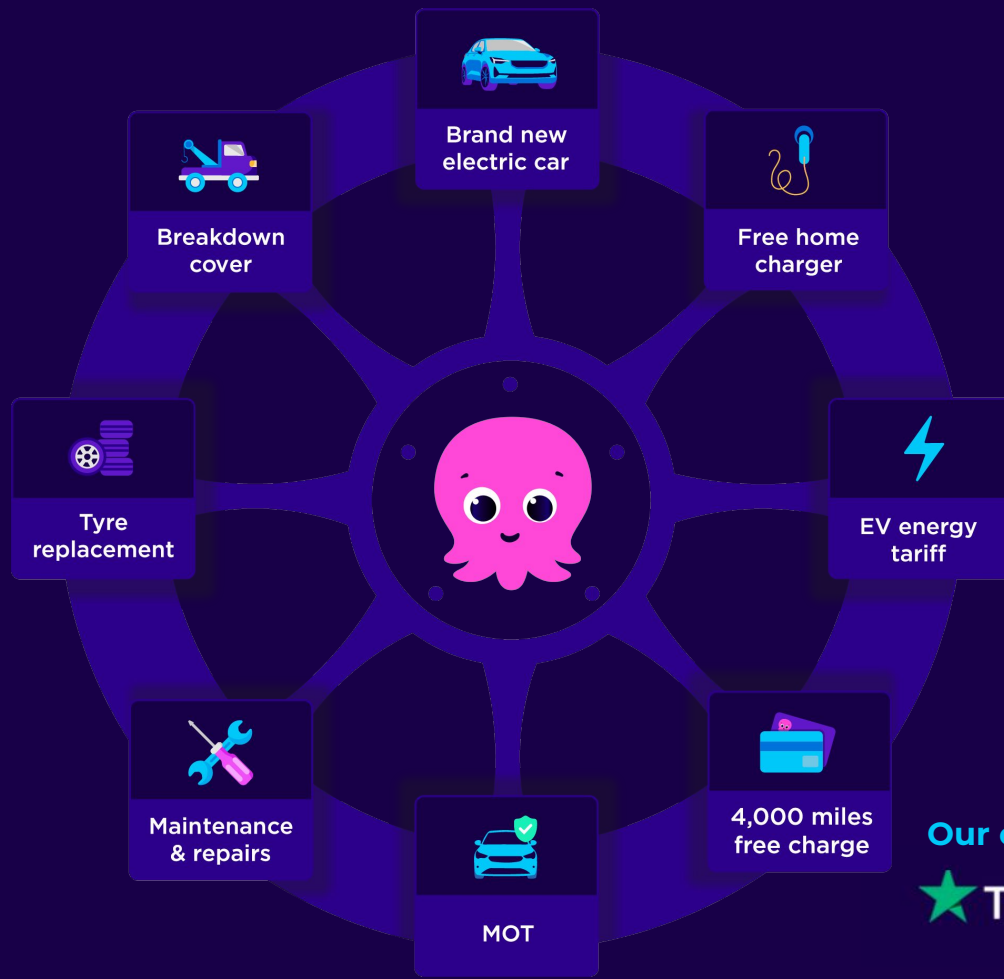

While keeping costs down

Save on national insurance contributions and give your team a cost-free benefit.

And there's no cost to join.

What's included with EV salary sacrifice?
